PROFESSIONAL EXPERIENCE

- Senior Business Analyst / Product Owner, EjadTech** **Mar 2025 to Present**
Riyadh
As a Senior Business Analyst / Product Owner and Technical R&D Consultant at EjadTech, I delivered Odoo ERP to the **National Center for Waste Management (MWAN Center)** across 11+ business units, reducing rework and manual processes by 82% through a customized Odoo-based ERP platform. Led requirements elicitation sessions and stakeholder engagement across all business units to ensure full digital transformation alignment.
- Senior Product Owner/Business Analyst, Youxel** **Dec 2023 to Feb 2025**
Riyadh
As a Senior PO/BA at Youxel, I successfully delivered innovative product solutions to clients such as **Riyadh Municipality** and the **Insurance Authority**. I excelled at translating complex business requirements into actionable plans through structured requirements elicitation and stakeholder engagement, ensuring project satisfaction and reducing clarification cycles by 25%.
- Senior System Analyst, Alqemam Qtech** **Jun 2023 to Nov 2023**
Riyadh - Cairo
As a Senior System Analyst at Qtech, I designed and optimized system processes to enhance product capabilities and customizations through CRs. Collaborated with stakeholders in many governmental municipalities, like **Asir** and **Hail Municipality**, to analyze requirements, ensuring the alignment of technical solutions with business objectives, which decreased CR turnaround 25% through structured gap analysis and change management practices.
- Product Owner, Alyomhost for IT solutions** **May 2022 to Jul 2023**
Cairo
As a Product Owner at Alyomhost, I prioritized and managed the product backlog to align with business goals and user

needs. I collaborated closely with cross-functional teams to deliver high-quality software products and drive innovation, increasing sprint delivery by 30%.

- **Junior to Mid-Level Business Analyst, Alyomhost for IT solutions**
Cairo

Mar 2020 to Jul 2023

As a Business Analyst at Alyomhost, my role involved engaging with project stakeholders, gathering and analyzing requirements, and standardizing BRD/SRS with enterprise clients, applying digital transformation strategy principles, which decreased UAT defects by 28%.
